Internal Medicine Residency Program

Overview of Internal Medicine Residency Program

The University Medicine Cluster at NUHS has a long history of excellence in patient care, education and research. Our residency programs reflect these strengths. Our programs are designed to ensure that training takes place in settings that are respectful of resident's needs and capable of delivering patient care efficiently, effectively and safely.

We have configured a host of programs that integrates training in clinical competence, academic scholarship, critical thinking and personal development. Our program will help you achieve mastery of clinical medicine and prepare you for the contemporary practice of medicine.

We emphasize on effective teaching and the principle of graded responsibility for patient care to enable our residents to become independent physicians. Our programs offer a broad based training in General Medicine, Cardiology, Pulmonology, Gastroenterology, Neurology, Nephrology, Dermatology, Intensive Care, Endocrinology, Infectious Disease, Hematology, Hematopathology, and Oncology.

Our goal is to create an optimal educational and clinical environment in Internal Medicine that helps residents achieve excellence in clinical performance, competence and personal development.

Outstanding Features of Program

1. A balanced training experience in both tertiary and community hospitals. National University Hospital, being a tertiary hospital with a full complement of subspecialties, provides a broad-based training with exposure to a wide variety of specialties within medicine.

2. A premier program with excellent faculty. Residents are mentored by our outstanding cadre of faculty who are recognized leaders in general medicine and subspecialties. Our dedicated faculty ensures that the residents’ development in academic scholarship and critical thinking are integrated with personal development and emotional maturity.

3. Innovative night float on-call system. We are the first institution in Singapore that has successfully implemented the night float on call system. This innovative on-call system ensures adequate rest for residents and prevents fatigue from long continuous working hours.

4. Comprehensive and innovative tools for teaching and evaluating the core competencies. Simulation laboratories, “learning through testing”, “learning through teaching”, online self-directed learning modules, examination preparatory courses are examples of the extensive innovations and resources developed for resident education in NUHS.

5. Opportunities for research and scholarly activities. As scholarship is a critical element of the university medicine cluster’s identity, our residents are encouraged and provided with resources to pursue research opportunities during residency.

List of APDs & Core Faculty Members:

1. Dr Datusz Piotr Oblzyca - APD
2. Dr Manjul Lahiri - APD
3. Dr Chan Yee Cheun - CFM
4. Dr Denny Teo - CFM
5. Dr Teng Gim Goo - CFM
6. Dr Michelle Gowans - CFM
7. Dr Benjamin Chuah - CFM
8. Dr Mehlin Chua - CFM
9. Dr Low Seew Ping - CFM
10. Dr Doddsabele Deepak - CFM
11. Dr Yip Waele Seng - CFM
12. Prof Phk Keong - CFM
13. Dr Huma Jafar - CFM
14. Dr Thovah Muang Aye - CFM
15. Dr Michelle Poon - CFM

46. Dr Ho Jing Jang Wilton
47. Dr Tay Hui Ming
48. Dr Mark Shinhui Mathiah
49. Dr Chong Chiong Hoi
50. Dr Wong Yi

### Residents’ Testimonials:

**’Being a resident...**

Much more challenging than anticipated!
But what doesn’t kill you.........

The learning has been tremendous –
Dr. Tan Li Wei

The dedication to and enthusiasm for teaching has not been exaggerated - neither has the quality.
Our senior faculty wants to make things better and improve the programme - they listen to what we are having trouble with and invite us to work with them on bringing about what we want to see change.
They have made friends with us, and are genuinely interested in our welfare and how we are coping.

All in all, not a bad deal!”

- Associate Chief Resident Dr Fooong Yi-Lin

“...The journey in NUHS Internal Medicine residency has definitely been an enjoyable and challenging one. There is good exposure to a wide variety of specialties and cases of varying complexities, with access to a group of mentors and seniors who are not only approachable but genuinely concerned about our training and overall well-being. Although the training is tough and the workload is high, the camaraderie shared amongst junior and senior staff and the structured programme put in place in NUHS have made it a fulfilling and enjoyable experience.”

- Associate Chief Resident Dr Tan Li Wei
