

My Health Map
By NUHS

**Take Charge of
Your Health Today**

My Health Map (MHM) is a preventive health management plan that empowers you to take the first steps to staying healthy.

Developed by the National University Health System (NUHS), MHM recommends health screening and vaccinations appropriate for individuals aged 40 years and above. These preventive health milestones are based on age and gender guidelines provided by the local health authorities.

Keeping track of your health status can help you make informed decisions about your lifestyle choices to improve your well-being and staying healthy as you age actively.

When you sign up for MHM, we can support you on your health journey by:

- + Keeping you updated on preventive health milestones appropriate for you.
- + Sending timely reminders about your upcoming screening or vaccination schedule.
- + Providing information about where you can access relevant health services at government subsidised rates.

Essential health screening & prevention milestones

Recommendations Following guidelines for individuals at average risk, with no known conditions	Age (years)		
	40–49	50–64	65 & up
